About Us

As the Acioz family, our company started its operations in 1997 with a focus on auto spare parts, import-export, and international transportation. In addition to these fields, following the implementation of the "Regulation on the Control of Waste Oils," we obtained a waste mineral oil recycling license from the Ministry of Environment and Urbanization in 2004 and began our recycling operations. On January 19, 2011, we received our environmental permit and license certificate from the Ministry of Environment and Urbanization and continue our waste oil recovery and mineral oil production activities in the 3rd Organized Industrial Zone of Konya.
