About Us

Located at the heart of the industry, Konya enables the development of agricultural machinery manufacturers in the region. One of Konya's leading producers, Alparslan Agriculture, stays at the forefront of the industry, keeping pace with global developments. Continuously following the latest technologies, Alparslan Agriculture has a machine park that continues to grow. With new investments in laser cutting, plasma, and robotic welding, the company is advancing its capabilities. With the addition of a powerful and fast laser cutting machine, Alparslan Agriculture meticulously manages the cutting processes for other industrial organizations as well, continually improving production and product quality. Alparslan Agriculture defines its goal as always striving to achieve the highest quality and carries out R&D efforts with great care.
