## Hakkımızda

As Agapak, we have been operating in the plastic industry for 20 years. We specialize in the production of reinforced nylon bags, roll garbage bags, and nylon bags. We offer our products to our customers with great care, considering their usage areas and specific needs, without compromising on quality. In addition to standard agricultural packaging, we also provide customized visual and functional designs tailored to our customers' requirements. During the production process, we conduct continuous manufacturing controls and strength tests to offer higher-quality and more appealing products to our business partners. This approach helps us minimize unit costs and deliver faster, flawless packaging to our customers. We cater to various industries, producing items such as pesticide bags, medical supplies, pulp bags, garbage bags, and more.
