About Us

From the first day we started our activities in Konya as Mehmet Akpınar Agriculture Irrigation in 1980 to this day, we have always determined our route in line with the wishes of our farmers. In 2007, our company, which filled a serious gap in the agricultural field as Akkon Plastik, started to make the farmers smile with the quality products it produced. Our company, which continues its production in 3200 m2 closed area and 10.000 m2 open area without interruption, has set an example for many companies by reaching many cities and towns throughout Turkey from Konya with its sensitivity in the products it produces.
