About Us

Companies. In 1995, the company started producing under the name Meram Un. Initially processing 200 tons of wheat daily, the capacity was increased to 400 tons per day in 1998 through additional investments. Wheat, the main raw material, is sourced not only from Konya and surrounding regions but also from other parts of Turkey such as Adana, Tekirdağ, and Çukurova, as well as from the Turkish Grain Board (TMO). The company's wheat silos have a storage capacity of 35,000 tons. In our region, Bezostaja and Gerek-type wheat are mainly cultivated.
