Hakkımızda

More than 60 years ago, brothers Helmuth and Alwin Lehner founded the company 'Alpenplastik Lehner Alwin GmbH'. Its first assets consisted of an electric molding machine purchased with courage, hard work and low costs. They turned their home's laundry room into a production hall and were grateful for any help they could get. Their passion for technical challenges remains unmatched to this day and is one of the cornerstones of our company.
