About Us

ALTAT CHOCOLATE and CONFECTIONERY started its production journey in 1993 in Konya, backed by years of experience and knowledge, always aiming for high-quality service and customer satisfaction. This journey began with soft candy production in a 1,500 square meter facility. In 2003, chocolate and compound chocolate production lines were added, expanding the product range. By 2013, with investments in new production lines and a larger factory space, total production capacity reached 50 tons per day in a 20,000 square meter facility. ALTAT aims to offer consumers high-quality products with delightful tastes. ALTAT produces compound chocolate, jelly candy, toffee, center-filled soft candy, hard candy, and center-filled hard candy. The company continues to invest in expanding its product range.
