About Us

With manufacturing roots dating back to the 1950s, our company has built significant expertise in the heavy-duty vehicle sector and has long been recognized as a reliable producer of spare parts for trucks, trailers and buses. Strengthened by nearly 30 years of production experience, we took a strategic step in 2002 with our new partners and established Arcek Construction Textile Automotive Ltd. Co. to expand and manage our foreign trade operations. Since the day of our foundation, our primary focus has been to deliver high-standard brake group components to the global market, increase our product variety, and develop solutions that best meet the needs of the industry. Today, thanks to our production capabilities and quality standards in brake systems, we have become a trusted brand both nationally and internationally.
