## About Us

ASKOD SOLAR has been serving in the solar energy sector since 2013.It has installed grid-connected land-based power plants and also grid-connected large-scale industrial and commercial rooftop solar power plants.Starting from the feasibility process for SPP power plants, it serves all of the application, project design and approval processes, installation, commissioning and acceptance processes.We continue to be at your side with remote monitoring and maintenance-repair support during the operation of the power plant.
