About Us

Our company, which started its production activities with aquarium materials since 1990, has gained experience in the production of heaters and aquarium filters for many years, and today it has expanded its production in this field to the entire aquarium group in a more professional way.
In 2015, it also entered the production of bird and rodent feed under the brand Exovit and offered it to the companies of which it is a supplier. It provides solutions to the needs in this field with many bird feeds and accessories.
Our company, which branded its productions for pet products with the CaDoPet brand in 2018, has brought many quality products in international standards in this line to the sector with the stamp of domestic production.
