About Us

Aybig Makine has been operating in the composite industry for more than 23 years. Composite industry is a very well known and applied industry in the world, but is not known enough in our country.Composites are easy to design, manufacturability with different methods, corrosion resistance, paintability, etc. Aybig Makine is an indispensable supporter of industrial products. We produce special end products and intermediate products for our customers with R & D, design, modeling molds and different production methods (rtm, lrtm, spray-up e, hand laying, vacuum infusion, epoxy etc.).
