About Us

In 1997, it started as an aluminum joinery and exterior cladding workshop in a 200 m2 closed area in the carpenters industry in the aluminum industry. In 2015, it started to produce and assemble aluminum handrail accessories within its own body. In 2019, as Aydınal Aluminum, it established a CNC, lathe benches and a state-of-the-art anodized coating facility in its 1500 m2 closed area factory in Elit Industrial Site and established its aluminum accessories production and marketing network with fully automatic machine parks.
