Hakkımızda

The contribution of agriculture and agriculture-based sectors to the economy of TURKEY is an indisputable fact. Technological developments in agricultural machinery produced with the results obtained enable our farmers to progress with high efficiency. Parallel to our developing and expanding agricultural potential, our need for state-of-the-art agricultural machinery is constantly increasing. Established in 1980 for the purpose of producing agricultural machinery, the enterprise continues its efforts to keep up with the existing in agriculture, increase productivity, and minimize production, with a management approach that puts customer expectations above everything else. Our company continues to contribute successfully to the progress of agriculture in the country with its common sense, drive, drive, and computer
