About Us

ÇAPALI as a brand entered the auto upholstery sector in 1998.

Being aware of the fact that investment is the way to sustainable growth, our company has started to be pronounced as one of the leading brands in Turkey by constantly transforming its earnings into investments with moves in line with industrial and technological developments. The foundations of our flooring brand, which brings fashion to life with hundreds of types and pattern options today, started with the experiences of our own production of auto upholstery. With the production of carpets, seat covers and interior curtains that started in 2000, today we offer our products produced in our own facilities to the Turkish upholstery sector and consumers.
