About Us

We produce products that are of great importance in animal nutrition and care. These are feed additive premixes, licking stone and bucket, udder cleaning products before and after milking, and milking machine cleaning products. Our company officially became operational in 2017 with the experience accumulated since 2012. It starts with completely domestic capital and continues on its way with the basic idea of quality, trust and efficiency. In addition to sales throughout Türkiye, we also carry out export activities to many countries. You can review our products in our online catalogue, if there are different products you want, you can write to us and get support. Apart from our own formulations, we also make contract manufacturing.
