Hakkımızda

We are in the age of technology and we are aware that customs clearance is no longer just importing, exporting, opening or closing a declaration. It is one of our main duties to follow and interpret the legislation, which is the most important part of our business, and to inform you, our esteemed companies, of changes and innovations. It is also our main goal to provide maximum contribution and benefit by ensuring that you, our esteemed companies, who are our strategic business partners, benefit from the advantages of the legislation and prevent them from making mistakes. We, as Demirler Customs Consultancy, see your company as our company rather than a customer, in addition to keeping you informed by closely following the changes in government supports and legislation.
