About Us

As EFE CNC, we wanted to move our activities to produce mechanical solutions for our customers since 2001 to a different platform in 2009. We expanded our activities to produce CNC-based solutions in order to make information technology, which we can call indispensable today, accessible to everyone in the field of production. In line with this purpose, as a result of ongoing research and development activities, we produced our first machine that offers the features approved by all those who want to use plasma technology in the field of thermal cutting, at an acceptable cost without compromising quality.https://www.facebook.com/Efecnc

Trademarks

EFE CNC plasma

Countries We Export To

Kazakhstan, Russia, Iraq

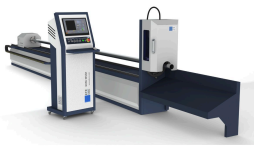
Countries We Import From

Canada

Countries We Import From

Electronic CNC control cards

Products



Product
CNC Plasma Pipe and Profile Cutting Machine

GTİP
845640

Product
Cnc Plasma Cutting
