About Us

EKMEKCELL

Türkiye's Digital Bread

The Technological Form of Suspended BreadAbout Ekmekcell

Ekmekcell is a social impact and technology platform designed to digitalize the traditional "suspended bread" system in Türkiye. Our mission is to connect bakeries, donors, and people in need through a transparent, traceable, and sustainable digital network. Through the Ekmekcell Digital Card System, beneficiaries can easily access fresh bread from contracted bakeries with dignity and convenience, while donors can contribute to a monitored and accountable support system.
