Hakkımızda

The Elif Brand has been created with years of experience, starting its activities in the first place of chocolate and wafer products and then continues to grow by including biscuits, confectionery, cake and chewing gum products in this product range. In its establishment, it did not consider a single target market, and offers its customers by making production in line with the demands of all countries and different product groups and customers. As Elif Çikolata, it markets and sells its products in different companies that produce food other than its own brand.
