About Us

ERKBY Tarım took the first step of its greenhouse investment with the geothermal source natural hot water license it bought in Konya Cihanbeyli district and decided to produce tomato, the only product going for export. In our greenhouse, irrigation, air conditioning, heating-cooling, spraying and fertilization are carried out with a fully automated system. There is a control and inspection mechanism.ERKBY Agriculture Inc.; Founded in Romania, Sterk Plast SRL. and Erkan GENÇ, a foreign capital partnership. Its equity capital is 90 Million TL. A Modern Geothermal Soilless Greenhouse investment of 50.000.000 TL (fifty million) will be made on an area of 700.000 m^2, on an area of 110.000 m^2, and approximately 150 people from Konya and Cihanbeyli will be employed in these greenhouses.
