Hakkımızda

Our company, which has been operating in Konya for 5 years, manufactures Single-sided and Double-sided Printed Circuit Board (PCB). FR4 35/0 and FR4 35/35 materials are used. Solder Mask and Tin Plating options are available for single face PCBs. Prototype and mass production are carried out. It only produces prototypes for double-sided PCBs and there is no in-hole coating. We are producing as bare copper. We have the opportunity to import your double sided mass production needs.
