About Us

Established in 2015, our company produces in main groups such as Pig Iron, Ductile Iron and Steel by using hand molding and manual molding methods in the casting industry. Our factory has an area of 2500 square meters. We have 2 dualtrack melting holding pot induction furnaces to support our production capacity. These furnaces have a liquid metal capacity of 1000 kg/hour in total. Our annual production capacity is determined as 1500 tons. With our expertise and experience in the casting industry, we aim to provide our customers with quality, durable and cost-effective products. We work meticulously to meet customer expectations and needs by producing by hand molding and manual molding methods. The induction furnaces in our factory provide fast and efficient production with their high capacities. In this way, we are able to provide
