Hakkımızda

İSRAPAK, which was established in Konya in 2015, started to serve the sector with the production of polyethylene and polyolefin Shrink Machines. İSRAPAK does not compromise on quality with its experienced team in the sector, and always keeps its innovative structure alive with the latest technological products it produces. İSRAPAK produces Semi-automatic, Fully-automatic, Continuous Cutting Shrink Machines in order to reduce packaging costs and highlight the appearance of products in industries such as food, chemistry, stationery, cosmetics, textile industry, etc. In addition to shrink machines, parcel banding machines, pallet stretching machines, dusty and granular product packaging machines and labeling machines. Our company produces semi-automatic Shrink Machines that can work mounted on production lines as well as
