Hakkımızda

In 1997, we set out to produce quality products that will contribute to the development of animals of all ages and sexes, especially the needs of vitamins, minerals and salts. Today, in our 1.000m2 production facility, we continue to produce and develop products that will make the face of our farmers smile with our expert team. We see that we have reached the target that we set while setting out with the 98.8% customer satisfaction rate that we achieved after sales, and we are happy to continue to do so.

With the investments we have made in recent years, we are making our sustainability in our production and sales operations permanent.
