About Us

Founded in 1975, Yumak entered the industry by manufacturing high-precision spare parts used in the engine components of heavy-duty vehicles. Taking its name from the surname of its founder, Mehmet Yumak, the company has placed quality and durability at the core of its production philosophy since day one, making this approach a fundamental principle of all Yumak products. Rather than being satisfied with producing good products, Yumak has always aimed for better, cultivating a production culture focused on continuous improvement. This consistent and dedicated approach has, over time, strengthened trust in the Yumak brand not only in Türkiye but across the globe.
