About Us

The year is 1920. The Roaring Twenties are just getting started. It's the start of an exciting decade when Charles Lindbergh will fly across the Atlantic, Albert Einstein will win the Nobel Prize, Mahatma Gandhi will begin his nonviolent protest, Deutsche Luft Hansa AG will be founded and the Nürburgring will open. And in Bad Cannstatt/Germany, the foundations of a global company are being laid: In the coming years, Ernst and Hermann Mahle will develop bestsellers and consolidate the reputation of today's global company as an innovator.
