About Us

Exactly 15 years ago, we realized the supply and demand gap in the market and entered the sector. Our founding purpose was to produce much more than the number of imported goods in the market and to increase domestic production. We faced many difficulties and negativities in the adventure that started with excitement and passion. After a long and intense R&D period, we presented our first product to the market. With the pride of being the first local Jimmy Jib company, our motivation increased with the extremely positive feedback from our customers.
