Hakkımızda

MEGATON is a unit of mass measurement of one million tons and small values cannot be measured with MEGATON. MEGATON has started its commercial life in the fields of simulation, augmented and virtual reality, mainly 3d animation, motiongraphics and cartoons. He pursues mega projects and ideas in his offices in Istanbul and Konya in the Netherlands and Turkey, with the dream of achieving mega power in his work areas. With its commercial understanding, hardware infrastructure and team spirit, it has achieved many successes in every new project it has undertaken in our country. It has also contributed to many successes as a stakeholder in overseas projects. MEGATON demonstrates its mega power with its work in the field of animation. It aims to make the Turkish animation industry a prestigious place around the
