About Us

Founded in 1996, Metkarsan began operations as a manufacturer in the agricultural machinery sector by producing rotary rakes and forage harvesting machines. In a subsequent phase, to meet market demand, the company also began manufacturing drum-type mowers, quickly reaching a large customer base and establishing itself in the industry. Metkarsan Agricultural Machinery, which never compromises on quality, has proven its quality by obtaining TSEK, CE, AFTER-SALES COMPETENCE CERTIFICATE, and WARRANTY CERTIFICATES.
