About Us

In 2000, our company started to produce refractory materials for the trade of the materials used in the casting industry and for the cupola furnace used by the industry.

The main activity is production of monolithic refractory materials; casting, casting and plastic refractory mortars for induction furnace acid lining, neutral (spinel) lining, induction furnace refractory, transfer, transport and reaction pots used in iron, steel and nonferrous metal industries.

We are also operating in the Konya Organized Industrial Zone with a wide refractor product range and 10,000 tons / year installed capacity in the sectors of energy, petrochemical, glass, ceramics, cement, lime, industrial furnaces and waste
