Hakkımızda

MOGESAN started its operations in 1994 in Konya Motor Vehicles Industrial zone with the production of cylinder liners for internal combustion engines with limited facilities in its workshop scale operation. In 1999, Mogesan moved to Zafer industrial zone and continued its activities. Because Mogesan cannot respond to the growing demands due to the fact that the factory in which it is located is not enough, Mogesan has increased its production area from 250 m² to 600 m². In 2001, Mogesan increased its manufacturing area to 1000 m² and started manufacturing Pistons. In a short time, a rapid growth in Piston production was achieved. In 2003, Mogesan moved to Konya 1. Organized Industrial zone and put its production into operation in its new region with an area of 7500 m². In mid-2013, which has an even larger area, moved to Konya 2.

Company Officials
