About Us

Our company, which started operating in 1984 with the title of Narpilsan Plastic Goods Packaging Manufacturing and Trade, has been serving for more than 35 years and aims to continue its service by increasing its quality and potential every year. Narpilsan started its plastic sector with the production of Polyethylene (PE) products and continues to develop its production and products in the packaging sector in this field, and also provides services in the field of Polyethylene Teraftalate (PET). Since our company has been serving the food industry for years, none of our productions are used with raw materials, and we also produce plastic products for every sector that enters our Plastic Blow Molding and Injection field. In addition to products that can be used by everyone, we also make special mold works for companies upon request.
