About Us

Nemutlu Pompa Döküm was established in 1975 as a foundry company in a 400 m² workshop located in Meram Industrial Zone. From its first day, the company has placed quality and craftsmanship at the core of its operations, quickly becoming a trusted name in the industry. For many years, Nemutlu operated intensively in the field of casting production, maintaining high standards and ensuring consistent customer satisfaction. In 1988, the company expanded into vertical shaft pump manufacturing and drilling systems, demonstrating strong production capability and rapidly gaining a respected position within the sector. By 1992, the production area was expanded to 1,200 m² and investments in infrastructure significantly increased.
