About Us

Our company, which continues its activities with years of experience and knowledge, has adopted the principle of delivering flawless projects to its customers by questioning all the details from the raw material input to the delivery of the machine in accordance with the philosophy of total quality management. Ortaş Değirmen has always managed to produce the best quality by means of CNC - Laser benches in its R&D based, advanced technology production facilities and brought these products to the sector with the brand of Ortaş Değirmen in many countries of the world. In the establishment of flour-semolina factories, in all processes such as production standard, material quality, product durability and after-sales technical support, it has adopted a professional approach that suits the Ortaş Değirmen brand and is aware of its
