About Us

Our activities, which started in 1975 with the manufacture of agricultural equipment and trailers in the Elazığ industrial site, continue in 2012 in Konya, which is the operated agricultural region, with our renewal, new product manufacturing and product development operations every year in line with the needs of our farmers. In general, we are working hard to provide the best service to our farmers with processing machines and tugboats. ÖREN TARIM, which attaches importance to the aesthetics as well as the internal structure of the products, directs its production with the appreciation and criticism of its focus. In this direction, ÖREN TARIM, which has brought its production and establishments to a modern structure, applies quality and management standards without compromise in order to maintain and develop this house.
