Hakkımızda

With the support of its past experience and experience, it has steered its production with the contributions of its customers and users on the way it started with the principle of having the machine produced by the machine by using the current requirements and technology. Currently, it continues on its way with R&D development in a closed area of 20,000 m², always in the understanding of unity and solidarity, by transferring its experiences to the masters that the founders have trained. Özen Değirmen Makine; The customer would like to thank its users and employees for their support.
