About Us

The submersible motor and pump industry, which we met at the beginning of the 2000s, brought a new breath to us and our valued customers, with the machinery production experience we had before. Since then, we have been producing 5"-6"-7"-8"-10" submersible motors and pumps, which are the main needs of the sector. In our 16.000 m² closed area facility built on a 30.000 m² land in Konya Organized Industrial Zone, We continue our investments without slowing down with our production lines with advanced technology and modern machinery.
