About Us

Pro Brake Caliper was established in 2017 to operate in the automotive brake systems sector. Thanks to its in-house foundry, Pro Brake Caliper maintains complete control over the casting process, the most critical stage of production, thus ensuring high strength, dimensional accuracy, and consistent quality in its products. Pro Brake Caliper specializes in the production of brake calipers for heavy-duty vehicles and serves both domestic and international markets with its modern production technologies and continuously developing engineering infrastructure.
