About Us

It was founded in 2006 by Ömer Demircioğlu to produce Hydraulic Fittings. REKMAN was founded on two main policies. These: To reveal the best quality product with quality management systems and to achieve this desired quality. With the most regular customer feedback and customer advice, product development, R&D process, product portfolio is developed for this purpose. When it started production in 2006, REKMAN has the capacity to produce 700 kinds of products. shipment reached 3850 pieces of product. It develops new product production every day with customer feedback and invests accordingly. At the end of 2022, it regularly exports to 8 countries.
