About Us

It was established in 1997, we succeeded to build a group of companies all joined together in one mission: "To identify and successfully meet the requirements of growing stone market, worldwide". How? "With quality, experience, flexibility and dynamism". This approach combined with extraordinary product quality has led to remarkable yearly increases in production and sales. As a result in rather short time we have become one of the major American and European suppliers for Turkish Natural Stone. We established a firm cooperation with the Turkish largest marble/travertine quarries and built a network of stockyards, subsidiary firms and representatives to assure the excellence of our products and the superior quality of our service.
