Hakkımızda

SAYSU POMPA and COLUMN PIPE was established by the late Seyid YANMAZ for the manufacture and repair of Milli Pumps and equipment, during the transition period of the 70's to a regular workshop and industrial site in Konya. In the beginning, it aimed to appeal to the center of Konya and its nearby districts with its manufacturing products, but in line with the demands, it continued its activities in the surrounding provinces and districts and started to serve. The company started working in the ductile cast iron submersible pump business in 2000 and focused on innovations in this field and setting targets for more.
