About Us

Our company started to serve its customers in 2001 in Konya Organized Industrial Zone with a daily production capacity of 4,000 pairs of rubber shoes, in an open area of 16,000 m2 and closed area of 7,000 m2. With the additional facilities it established towards the end of 2003, it has invested to increase its capacity to 8,000 pairs daily by producing PVC-based injection shoes and slippers, PVC-based fitted flax shoes, thermo-rubber-based leather boots and shoes and rubber-based boots. In early 2006, thanks to his experience in producing rubber shoes, rubber soles and parts, he established his own mold workshop and entered the automotive supplier industry. The scissors bushes demanded by the market have been molded and presented to their customers. In the beginning of 2007, it started to produce engine wedges, engine ear
