## About Us

SYMBOL VENTILATION; It operates in the manufacturing and marketing sector of ventilation systems in Konya. Our company, acting with the principle of being a reliable institution, keeps the product and service quality at the highest level in order to make this principle a corporate culture. It has always aimed to go forward with its higher quality products in the light of its efficient working strategy, in which the satisfaction of our customers is kept at the forefront. In the sector we serve, the ventilation systems demands of many individuals, institutions, organizations and companies have been met with success. We aim to increase the number of our customers even higher in the future without sacrificing quality. The main working principle of our company is to meet the expectations and needs of our customers on time and economically,
