About Us

Meet With SempaPressure, Traction, Thrust! Our sympathetic three movements. Beyond the pump production, we are producing our technology movement that can communicate with the user and continue the cycle it creates in the future by using our attractive power against constant mindedness.The pump is an engineering that exchanges services in buildings, agricultural areas and industrial areas that are the dynamic areas of our lives. Our main goal is to mobilize our sympathetic engineering and turn it into safer, more economical and more autonomous systems that make life easier.
We can produce pumps at world standards with30.000 m2 fully integrated production facility. With our continuous production technology investments, we improve our ability to solve current problems and produce qualified.1972!We used
