About Us

Senta Plastic has been a leader in the plastics industry since 2003, offering innovative and high-quality solutions. Specializing in the production of plastic bottles in various volumes and models from 100cc to 30 liters for agricultural pesticides and liquid fertilizers, our company has adopted the principle of offering excellent products by taking into account customer needs and areas of use. In addition to the standard packaging of the sector, we aim to exceed customer expectations with our visual and functional designs tailored to the needs. In our production processes, we keep the durability and efficiency of our products at the highest level by using advanced technology and continuous quality control methods. Thanks to our strength tests and continuous improvement practices, we optimize costs and realize fast and error-
