About Us

Since 1975, we have been experiencing the process of light starting from an ordinary light bulb swinging on the ceiling and contributing to urban aesthetics with the developing technology. Nowadays, light, which is freed from being trapped in any object, has become an architectural element that directs the space, increases the quality of life, and helps to provide safety and security easily. Being aware of the power and necessity of light, we combine our experience from 1975 with today's needs in SIRRAC. From design to production; We prioritise customer satisfaction with our aesthetic, functional, environmentally friendly, efficient, safe, comfortable, economical products.
