About Us

Our company started its commercial activities in 2005 with 2 common minds in a small workshop. It has become a link in the production chain by making machining to institutions and organizations in various sectors. Currently, it continues its production in a closed area of 1200 m². When it comes to 2015, it has started to search for a new sector in order not to be affected by the extreme competitive environment in the global market in recent years, and to contribute to both the company and the country's economy by achieving the targets it has set. The automotive sector is one of the most important industrial areas both in our country and in the world, and due to its contributions to employment, production and exports, considering our previous services, it has started to search for products that cannot be produced locally, but
