About Us

STF Irrigation Systems delivers reliable, sustainable, and long-lasting solutions for agricultural irrigation infrastructures through a comprehensive product portfolio developed to meet the needs of professional users and project-based applications. All products are engineered and manufactured to perform efficiently under diverse geographical and climatic conditions. The STF product range offers an integrated system structure consisting of drip irrigation pipes, sprinkler and mini sprinkler systems, filtration solutions, and plastic connection and auxiliary components. Each component is optimized with a focus on system compatibility, pressure balance, and operational continuity. Quality consistency, measurable performance, and product standardization are fundamental principles throughout STF's production processes. Thanks to
