About Us

TERMOKAR was established in 1996 to produce Cooling Systems. By 2000, Termokar focused on producing Industrial Cooling Systems (Chillers) after its first export to Norway. TERMOKAR has adopted the principle of using the products of the world's leading manufacturers in the sector in all its products due to its quality understanding. In this way, the quality has automatically increased and minimized the need for technical service. With its wide application solution, Termokar has succeeded in being the solution partner of sectors in the Plastic and Rubber Industry, Medical, Pharmaceutical, Food, Automotive Industry, Industrial Machine Tools, and Comfort Air Conditioning. The fields of activity of our company are package type of Chiller Water Cooling Systems, Closed Circuit Water Cooling Systems (thermo-convector), Axial Fan Water
