## About Us

Established in 2007, UKDE Engineering has grown into one of Turkey's most trusted and technically advanced manufacturers in the glow plug industry. With a strong commitment to innovation, precision engineering, and sustainable production, the company has played a significant role in reducing Turkey's dependency on foreign suppliers in the glow plug segment. Over the years, UKDE Engineering has built a solid infrastructure equipped with modern manufacturing technologies and a highly skilled workforce. Today, the company reaches an impressive annual production capacity of 1.5 million glow plugs, making it a strategic provider for domestic and international automotive markets.
